

Rewilding Maths Workshop

Monday 17 – Friday 21 June 2024

The programme is subject to change. All times are British Summer Time (BST).

Our question: ‘How can maths help with rewilding?’

This will be a working workshop. There will be few formal presentations. More time will be devoted to working in groups on the topics we have identified in the responses to the recent questionnaire. There will be ample for the groups to share their progress and questions. If there seems enough interest in a specific topic or question and the expertise is available then we may organise impromptu presentations to clarify the issue.

Online participants: The plenary presentation/discussion sessions which are expected to work well for the online participants are highlighted in green below.
